

Matcee Artapiyatham

UX/UI Designer (UX Research-Driven) | Product-focused Freelance (10+ projects)
Bangkok, Thailand | Phone: +6695 419 1797 | aa_artar@hotmail.com | [LinkedIn](#)

PROFILE

UX/UI designer with 3+ years of freelance experience, specializing in research-driven design for complex systems. Experienced in usability testing, data-informed decision making, and cross-functional collaboration. Published UX research accepted at an international conference.

EDUCATION

Chulalongkorn University

Bachelor of Science in Computer Science

Relevant Coursework: UX/UI design, Data Warehouse and Data Mining, Database System, Architecting On The Cloud

Bangkok
Graduated on May 2025
GPAX 3.25

TECHICAL SKILLS

UX & Design: UX Research, Usability Testing, User Flow, Information Architecture,

UI & Prototyping: Wireframing, Prototyping, Layout, Typography, Visual Hierarchy

Tools: Figma, FigJam, HTML/CSS (basic), Adobe Photoshop, Adobe Illustrator, SQL (supporting)

Collaboration: Stakeholder communication, Cross-functional teamwork

Other Skills: Data analysis, Communication, Documentation

WORK EXPERIENCES

UX/UI Designer (Freelance)

Web-based platforms & direct clients | Figma

- Owned end-to-end UX/UI design for 10+ production-grade client projects, from user research and requirement modeling to UI specification and delivery
- Translated user needs and business constraints into structured user flows, information architecture, and high-fidelity interfaces
- Iterated designs using usability heuristics, qualitative feedback, and design rationale to optimize clarity and task efficiency
- Partnered closely with engineers to ensure technical feasibility, clear design specs, and high-quality product implementation

Bangkok
Aug 2022 - Present

Contract Database Administrator

Agoda Service Co., Ltd. | SQL(MSSQL), Grafana, Kibana

- Monitored server performance at both CPU and instance levels, analyzing query execution patterns and system health to ensure reliability and responsiveness.
- Investigated performance issues including high CPU usage, high load, and timeouts by comparing server behaviors and collaborating with database owners to identify root causes and implement solutions.
- Maintained smooth log shipping operations to support database integrity and ensure continuous data availability across environments.
- Built Grafana dashboards to monitor Hyper-V and MSSQL metrics (via Telegraf), enabling proactive detection of anomalies and reducing incident response time.

Bangkok
Jun 2025 - Present

PROJECT EXPERIENCE

Redesigning LMS Assessment Interfaces for Instructors (MyCourseVille)

Senior Project | Peer-reviewed Paper (TechDev2025 Accepted)

- Led a full-scale user-centered redesign of a production LMS assessment platform, applying systematic UX research and evaluation methodologies
- Conducted in-depth qualitative research (semi-structured interviews, Think Aloud Protocol) with instructors to model real-world workflows and cognitive load
- Designed and validated UX solutions using quantitative usability metrics (SUS, UEQ) and expert heuristic evaluation, demonstrating measurable UX improvements
- Translated research findings into scalable interface architecture, task flows, and data-driven design decisions, culminating in an international conference-accepted paper (TechDev2025)

Bangkok
Sep 2024 – Jul 2025

LEADERSHIP & EXTRACURRICULARS

- UX/UI Designer, Information System Development Department, Student Council, Chulalongkorn University
- UX/UI Designer, IT Department, Thinc. Club, Chulalongkorn University
- Graphic Designer, CUNEX, Chulalongkorn University
